## **PLANT ENZYMES with GR8CF-77™ Digestive Support** Enriching Gifts International's core product is its exclusive Plant Enzyme formula

Enriching Gifts International's core product is its exclusive plant enzymes containing a rare and unique ionic mineral blend, trademarked GR8-CF77™ formula. This formula contains 9 plant-based enzymes that help digest proteins, fats, carbohydrates, starches, sugars and all foods. As our core product, plant enzymes enable all of our other products to be so effective.

***The best way to achieve optimal health is by having high enzyme levels in your body and conserving the body's enzyme production, which diminishes with age. When your body has an abundance of enzymes, it can protect itself and repair the damage from virtually all-degenerative diseases.***

Enzymes are a key piece of the puzzle of life, because they make all the other pieces work. Enzymes are the very life force that activates vitamins, minerals, proteins and other physical components within your body, furthermore, these components can't do their work without enzymes!

Most health products focus on giving your body the materials it needs to get healthy, but they forget to give the body the power to make those tools work. Your body needs water, vitamins and ionic minerals to function optimally. Supplemental Plant Enzymes take the drain off your body's "work force enzymes" and build up your body's immune system and fight off disease while improving the functioning of your entire body. **Plant Enzymes can do as much or more for the human body than any other health product available!**

***If you eat food that has been cooked, baked, boiled, micro waved, or in any way heated or processed, or if you drink carbonated beverages, you are prematurely depleting your body of enzymes - its very life force.***

### **Enriching Gifts Plant Enzymes Key Benefits:**

- increase your immune system function by reducing toxicity in the blood
- increase your lifespan and your quality of life by preventing the premature wasting of Enzymes through your digestive process
- increase your rate of digestion and bioavailability of nutrients.

***When your enzyme supply runs out, you die and you won't have another chance to replenish them. Make sure you conserve and replenish your Enzyme supply every day with Enriching Gifts preparatory blend of Plant Enzymes.***

## PRO-BIOTIC with FOS™ Intestinal Flora Support

Having “friendly” bacteria in the intestines is one of the keys to boosting your immune system. These “friendly” bacteria are destroyed by such common factors as carbonated drinks, laxatives, birth control pills, coffee, alcohol, aging, stress and antibiotics both taken for infections, colds, flu’s, and those found in meat you eat

Friendly aerobic bacterial strains can aid your digestion and elimination, suppress harmful anaerobic bacteria, improve absorption of minerals, and reduce toxins in the bloodstream and GI tract. EGI’s Pro Biotic Flora with FOS has eight “good-guy” bacterial strains. These eight strains are selected and manufactured according to the proprietary processes developed by Dr. Khem Shahani, the world’s leading expert in the area of friendly bacteria.

### Enriching Gifts Pro-Biotic with FOS Key Benefits:

- **acts on the body’s “second immune system”**
- **proven to increase digestion and elimination of toxic waste**
